

Course code	OSE331
Course name	T-HUET - Tropical Helicopter Underwater Escape Training with Initial Sea Survival
Duration	07h 50min
Target group	This training programme is designed to meet the offshore safety and emergency response training requirements for personnel new (or returning) to the energy industry in a tropical environment.
Prerequisites	- RG and CPF; - Passport (Expatriate);
Objective	The aim of the Tropical HUET with Initial Sea Survival training programme is to prepare learners that intend to travel to and from offshore installations and vessels by helicopter in a tropical environment by providing specific training in pre-flight and in-flight requirements and to equip learners with the basic emergency response knowledge and skills required in the event of a helicopter emergency - with a specific focus on escaping from a helicopter following ditching and sea survival techniques.
Contents	<p>UNIT OIS-81 Helicopter Safety and Escape - Tropical: Outcome 1 Helicopter Travel; Outcome 2 Helicopter Emergencies; Outcome 3 Practical helicopter Escape Techniques.</p> <p>UNIT OIS-431 Initial Sea Survival - THUET: Outcome 1 Evacuation Methods and Procedures; Outcome 2 Sea Survival and Emergency In-Water Actions.</p> <p>Total Contact Time: 07h 50min Technical Reference: OPITO Registration Code 5192.</p>
Exam	Learners will be assessed against the learning outcomes specified using direct observation and verbal questions. Learners will be assessed using verbal questions for UNIT OIS-81 (Outcomes 1-2) and UNIT OIS-431 (Outcome 1). Learners will be assessed using direct observation of practical exercises for UNIT OIS-81 (Outcome 3) and UNIT OIS-431 (Outcomes 2). To achieve the T-HUET with Initial Sea Survival Training the learners will need to complete the 2 mandatory units, correctly answering all verbal questions and successfully completing all practical exercises specified.
